

DENTAPEN

by Septodont

the **PERFECT MATCH**
for your practice

NEW!

DENTAPEN

Beyond injection: Dentapen, the new generation of powered injector for Dental Anesthesia

Matches your patients' preferences: constant flow to reduce pain, non-threatening look

Matches your needs: comfort and reproducibility of your injections all-day-long

Matches your habits: no training, both syringe and pen-like handling, compatible with any needle

MANAGING
PAIN FOR
YOUR
PRACTICE

CCLAD TECHNOLOGY*

TESTED ON DENTISTS

- A study conducted on dentists demonstrated a marked reduction in pain perception for injections using a CCLAD system**

- **96%**  of dentists tested received a palatal injection, and preferred the electronic syringe over the manual one

- **Pain was reduced** when compared to a standard manual syringe

*CCLAD (Computer-Controlled Local Anesthesia Device)

**Hochman MN, Chiarello D, Hochman CB, Lopatkin R, Pergola S. Computerized Local Anesthesia Delivery vs. Traditional Syringe Technique. NY State Dent J. 1997;63:24-9.

NO TRAINING NEEDED

5 INTUITIVE BUTTONS

- **Activation**
automatic self-aspiration
- **On / Off**
with battery level indicator
- **Speed Selection**
fast: 1ml/30s | medium: 1ml/60s | slow: 1ml/90s
- **Mode Selection**
 - intraligamentary mode: the slowest speed with maximum force
 - ramp-up mode: anesthesia flow increases gradually and constantly
- **Rewind Retraction**
return to the initial position and insert the next cartridge
